Parts of a circle worksheet tes

arrow back Back to Circle Theorems and Parts of a Circle Whether you want a homework, some cover work, or a lovely bit of extra practise, this is the place for you. And best of all they all (well, most!) come with answers. Contents Mathster is a fantastic resource for creating online and paper-based assessments and homeworks. They have kindly allowed me to create 3 editable versions of each worksheet, complete with answers. Worksheet Name 1 2 3 Parts of a Circle for Circle Theorems 1 2 3 Circle Theorems 1 2 3 Circle Theorems (advanced) - no reasons required 1 2 3 Circle Theorems (advanced) - reasons required 1 2 3 Corbett Maths keyboard_arrow_up Back to Top Corbett Maths offers outstanding, original exam style questions on any topic, as well as videos, past papers and 5-a-day. It really is one of the very best websites around. This page lists recommended resources for teaching geometry and measure at Key Stage 3/4 organised by topic. Huge thanks to all individuals and organisations who share teaching resources. Quick links: Time | Measures | Loci | Constructions | Compound Measures | Similarity | Congruence | Angle Basics | Angles in Parallel Lines | Bearings | Angles in Polygons | Quadrilaterals | Circle Theorems | Perimeter & Area | Circles | Volume & Surface Area | Real-Life Graphs | 3D Drawing | Coordinates | Symmetry | Shape Transformations | Enlargement | Pythagoras | Trigonometry | Bounds | Vectors | Geometric Proof | Revision Time Units, Scales and Measures (back to top) Loci (back to top) (back to top) I used these resources with my year 8 top set for their parts of a circle lesson. I went through the definitions and then questioned them to fill in the diagram - it worked perfectly thank you very much Empty reply does not make any sense for the end user THIS RESOURCE IS LEFT HERE FOR ARCHIVAL PURPOSES. Please use the newer GCSE/KS3 Area of Triangles/Quadrilaterals and Area/Circumference of Circles resources. (a) Find the perimeter and area of rectilinear shapes. (b) Find the area of a triangle, trapezium, parallelogram. (c) Find the area and circumference/perimeter of circles and fractions of circles (e.g. 1/2, 1/4). (d) Appreciate strategies to find areas of composite shapes, by (i) adding areas (ii) subtracting areas, including appreciation of the 'frame' method and (iii) cutting/reforming areas. (e) Appreciate that triangles have the same area if their base and height are the same, and compare sizes of triangles by considering the proportion of base/height. (f) Find what fraction of a shape is shaded by splitting into congruent shapes. I regularly upload resources that I have created during 30 years as a teacher. Most of these are maths, but there are some ICT/Computing and Tutor Time activities. All of the resources are my own and are not available from third-parties. The resources have been tweaked over time and I have had many happy lessons and shed-loads of happy and successful students. At the end of 2017 the TES announced that I was the most downloaded new author and in 2018 another 2 million were added to the count. Last updated 10 November 2019 These worksheets (with solutions) help students take the first steps and then strengthen their knowledge of the names of the Parts of a Circle. Questions are carefully planned so that understanding can be developed, misconceptions can be identified and so that there is progression both across and down each sheet. Interactive versions of these sheets are available at The interactive version allows individual questions to be selected for enlarged display onto a screen. The answer can then be worked out 'live' by the teacher (or student) or a single click will reveal my solution. This not only helps in class, but it is also very useful for a student who is revising at home. Creative Commons "Sharealike" Select overall rating (no rating) Your rating is required to reflect your happiness. It's good to leave some feedback. Something went wrong, please try again later.
